Front cutaway

1 Chanter

2 Chanter stock

3 Bag stock

4 Chanter cap

13 Bag

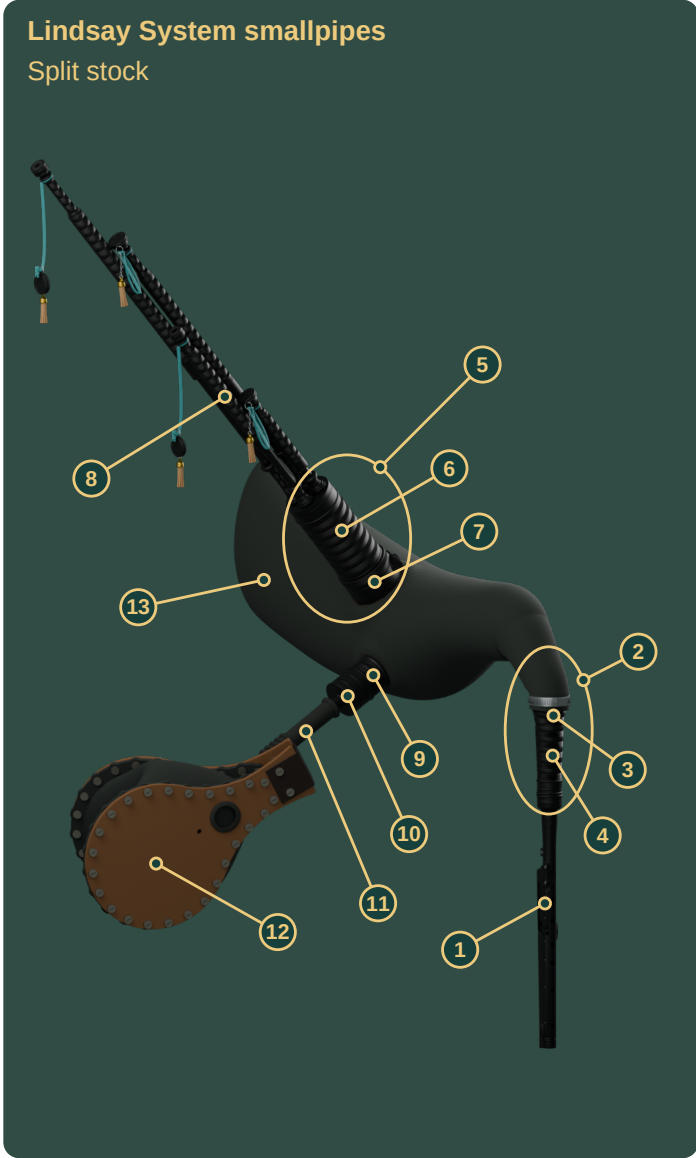

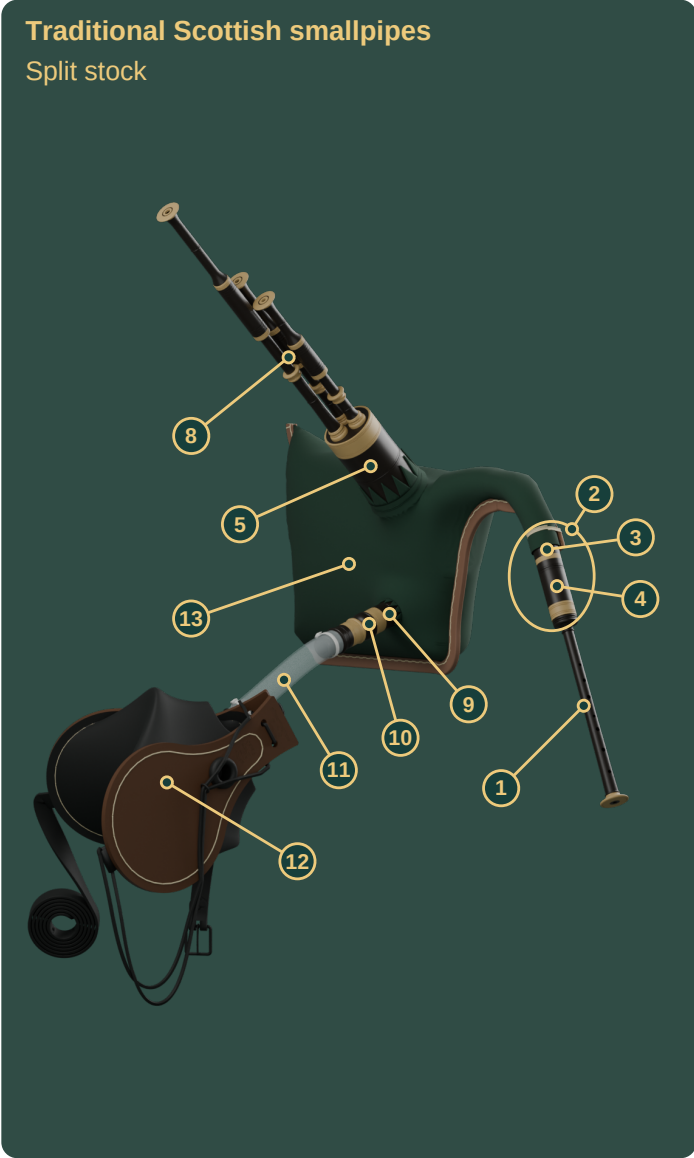

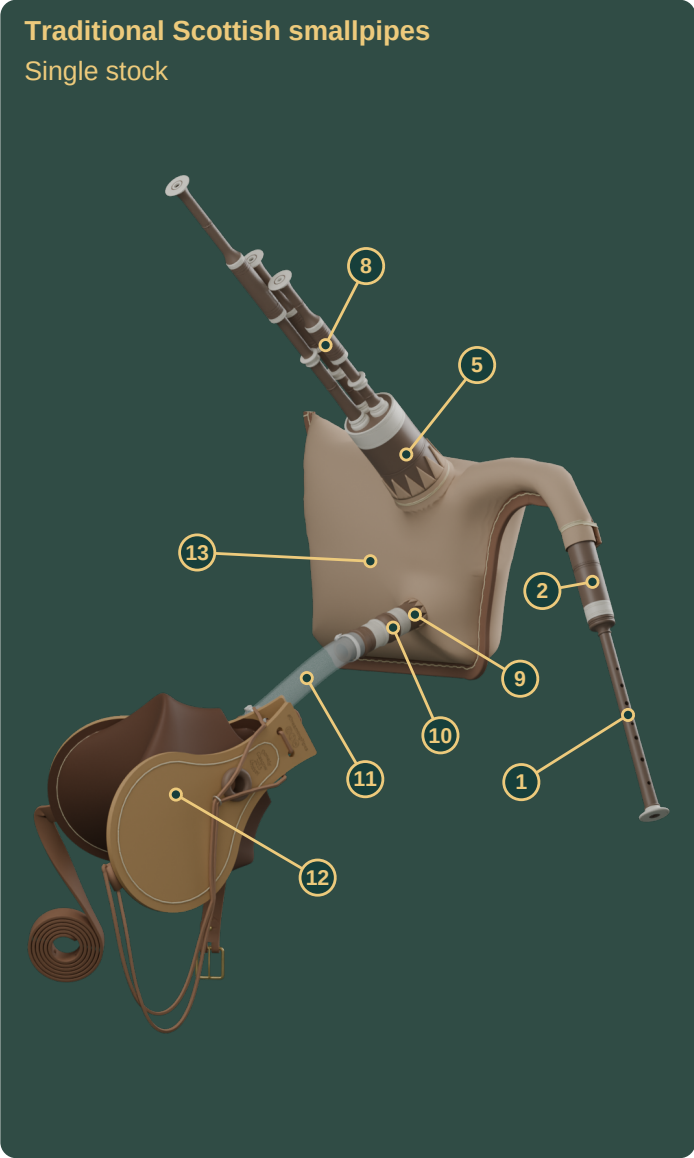

14 Reed

15 Tenon

A tenon is the projecting end that fits its matching socket.

The bag stays in place and is shown faintly behind the solid front cutaways.

The complete instruments

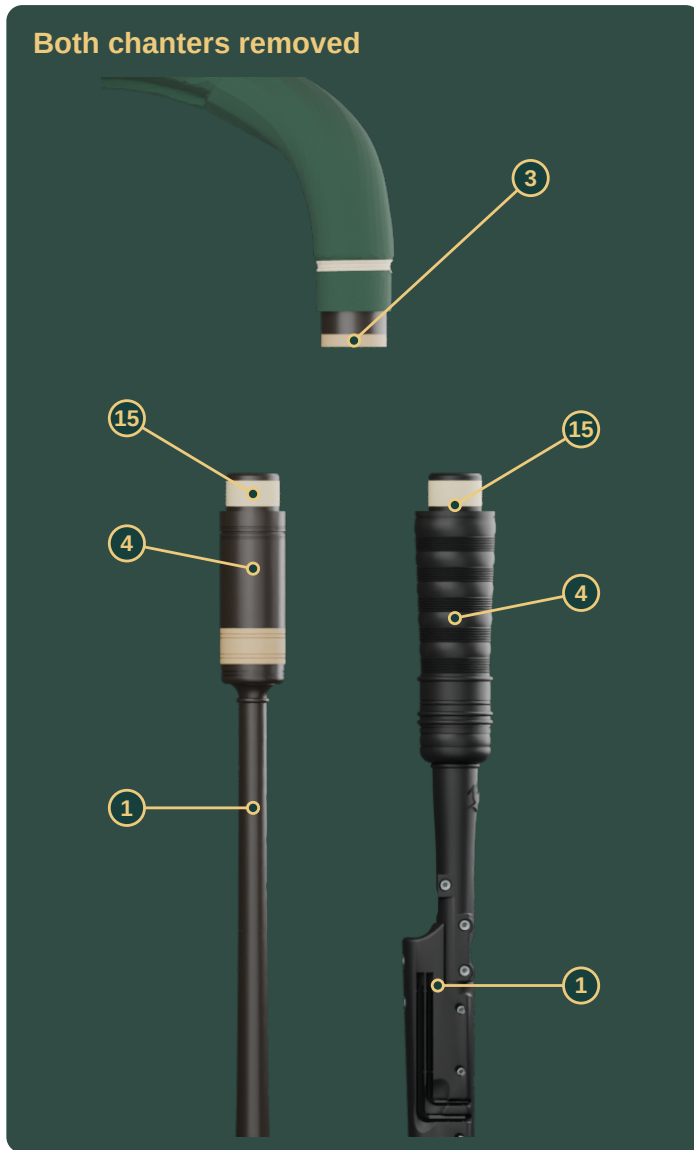

- | | | | | |
|-------------------------------------|-----------------|-------------|---------------|----------------|
| 1 Chanter | 2 Chanter stock | 3 Bag stock | 4 Chanter cap | 5 Common stock |
| 6 Main stock | 7 Cup stock | 8 Drones | 9 Blow stock | 10 Blow pipe |
| 11 Bellows pipe, including its ends | 12 Bellows | 13 Bag | | |

Use your existing split stock

Keep the bag stock. The Lindsay chanter cap has a tenon sized to fit it, with room for hemp.

Original chanter on the left; Lindsay System chanter on the right in each view.

① Chanter

③ Bag stock

④ Chanter cap

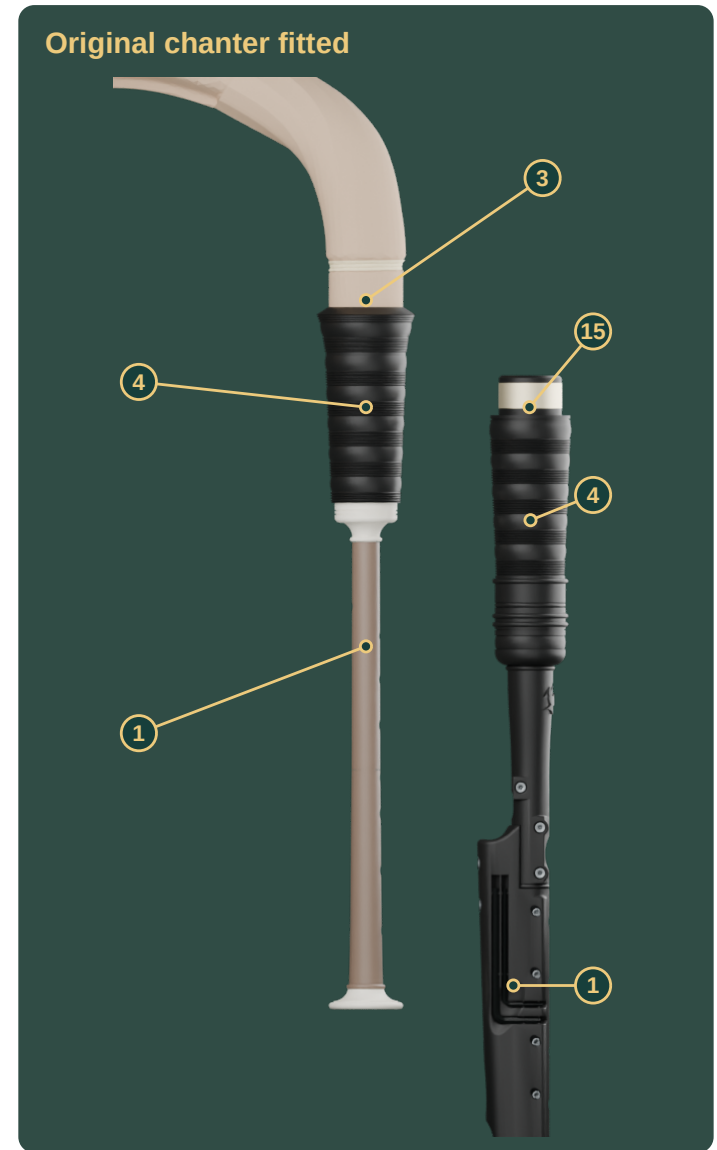

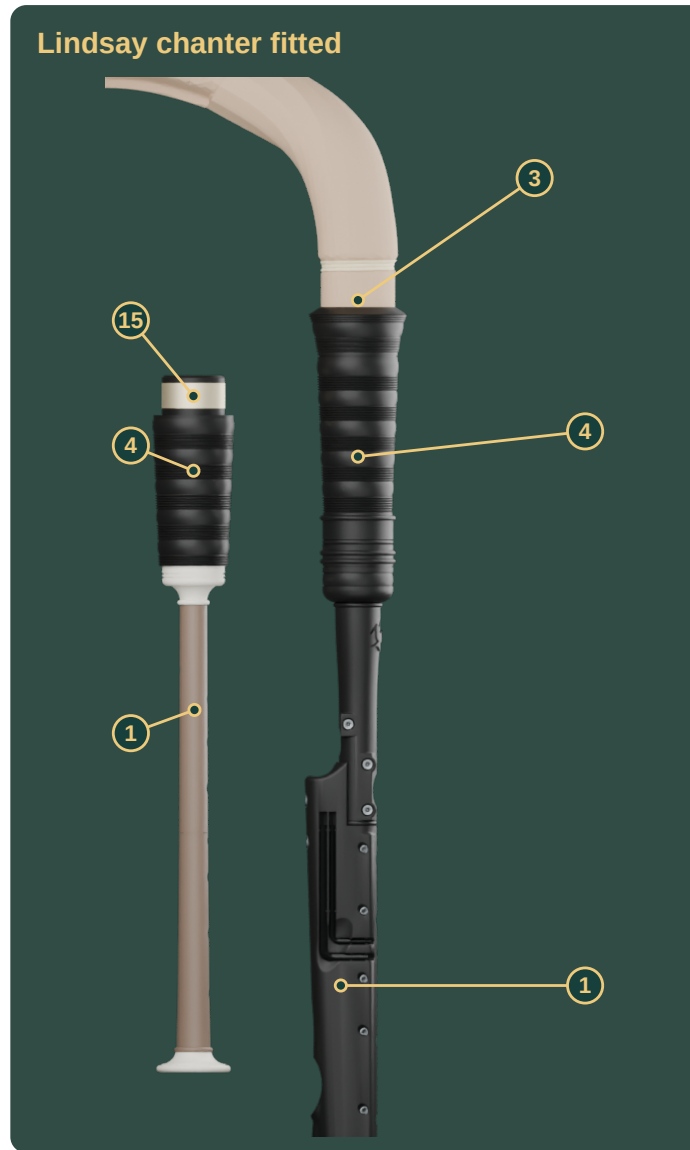

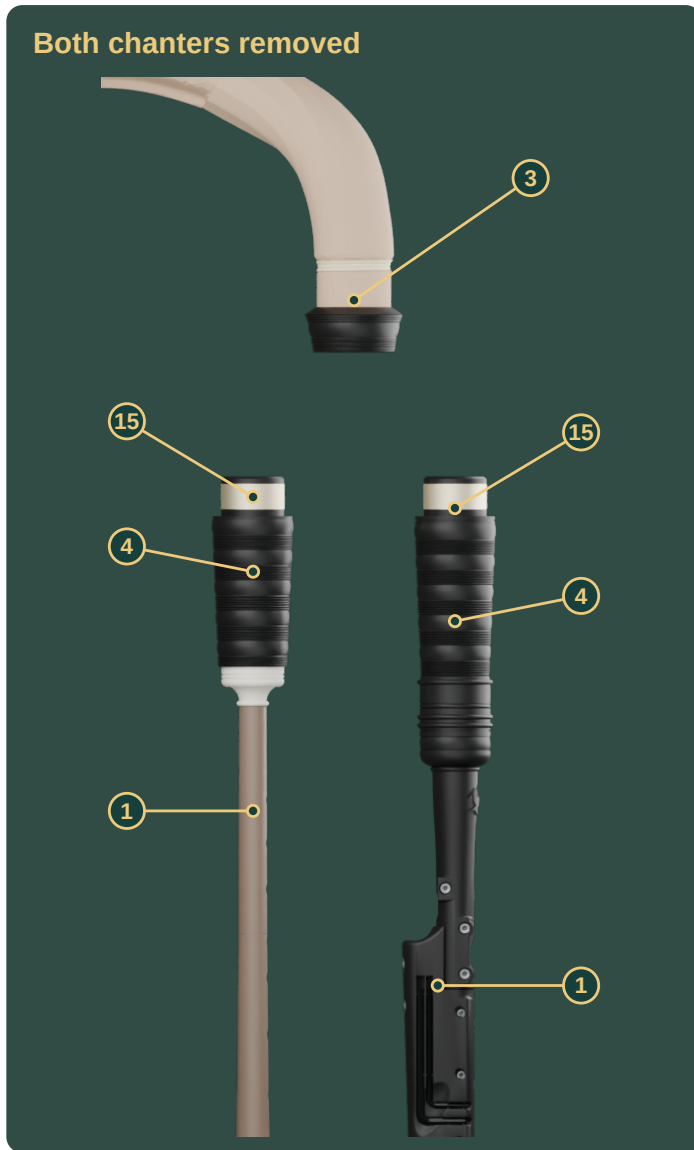

⑮ Tenon

Each chanter keeps its own cap. The bag stock stays in place when the chanters are exchanged.

Replace a single stock - Lindsay style

A black Lindsay-style bag stock and an open-top cap for the original chanter let either chanter fit.

Original chanter on the left; Lindsay System chanter on the right in each view.

① Chanter

③ Bag stock

④ Chanter cap

⑮ Tenon

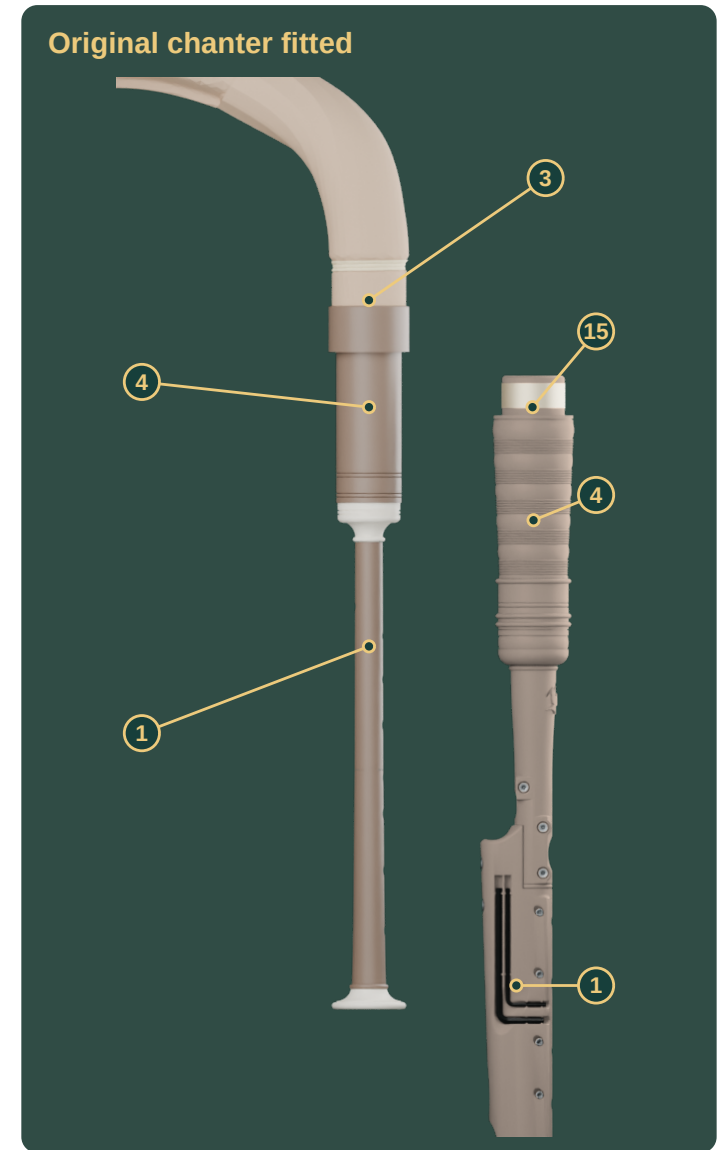

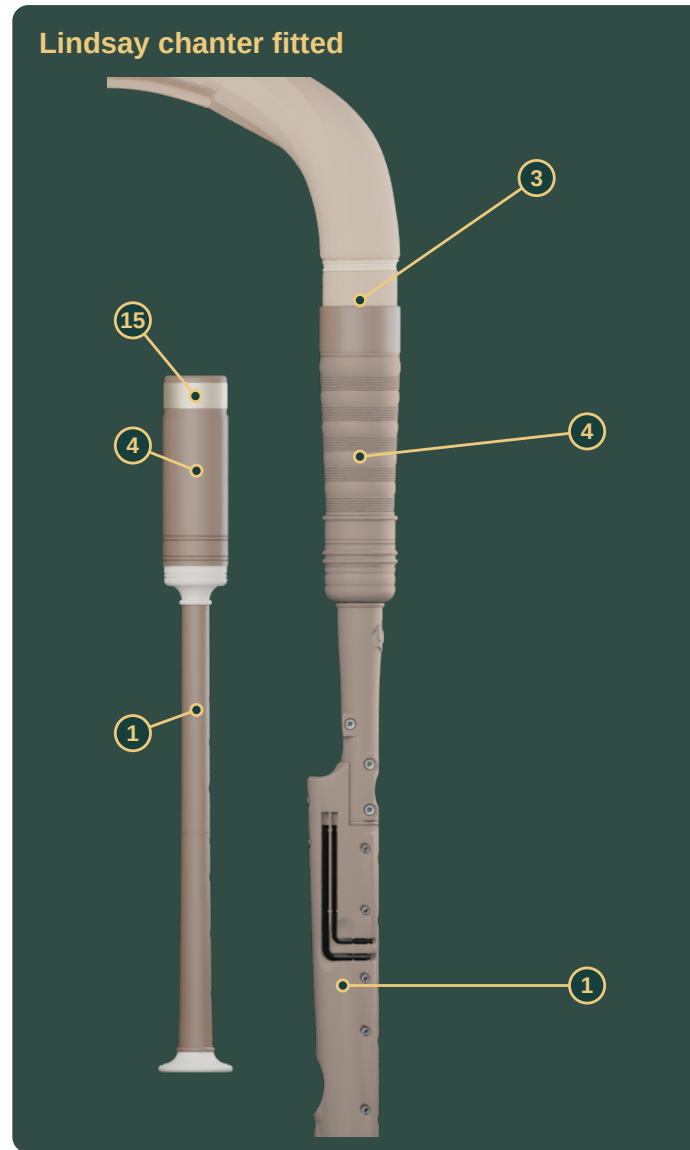

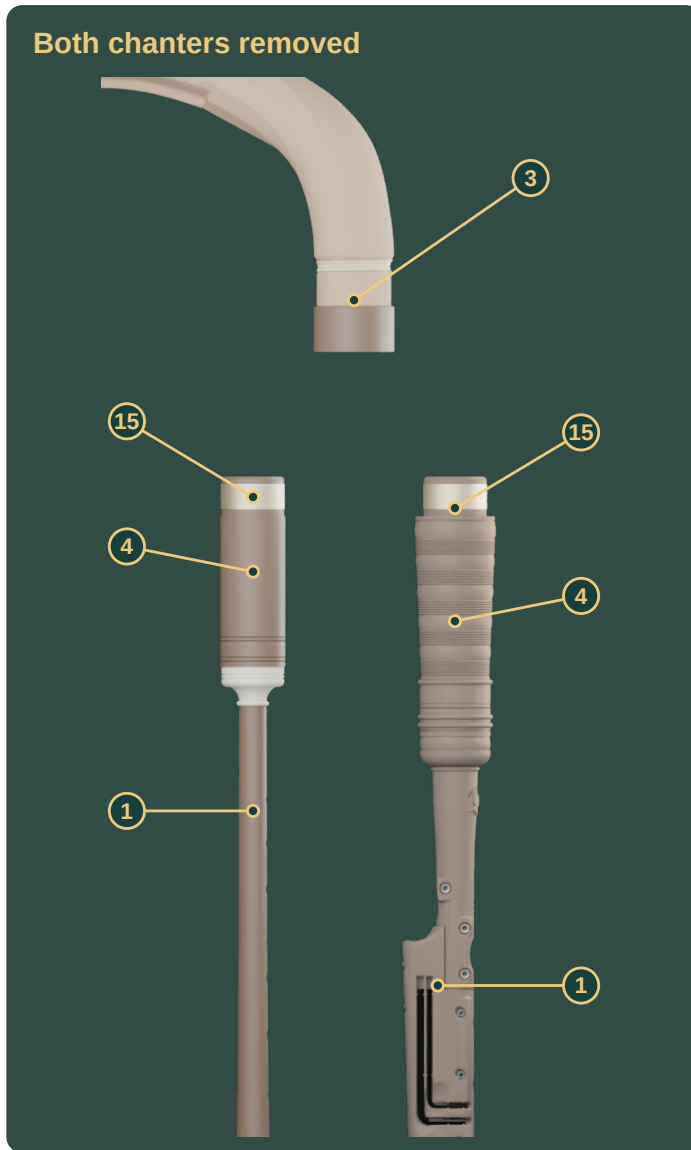

Each chanter keeps its own cap. The bag stock stays in place when the chanters are exchanged.

Colour and style matching is on enquiry. Please contact us to discuss your needs.

Approximate colour and style match

Replacement parts can be approximately matched to your pipes. Please contact us to discuss your needs.

Original chanter on the left; Lindsay System chanter on the right in each view.

① Chanter

③ Bag stock

④ Chanter cap

⑮ Tenon

Each chanter keeps its own cap. The bag stock stays in place when the chanters are exchanged.

Specialist colour matching is something of a premium option. We will confirm the options and price before you decide.
